

World Labyrinth Day

... hold this as an imagination...

...think about the fact that labyrinths appeared all over the world, long long ago,
when there was no obvious form of communication from continent to continent

...this is one of life's mysteries...how did this happen?

...think of it as one of Divine's gifts...given to assist humankind
as it goes through its growth and evolution

...we have an opportunity on the first Saturday in May to take full advantage of this gift

...people all over the world will be walking labyrinths in celebration

...the greatest gift we can give the labyrinth is to utilize it for the purpose it was given to us

...to affect a feeling of connection to labyrinths all over the world
and to all the people walking them on this day

...with this connection we can affect major shift in our human thinking,
our human willing, and our human doing

...we understand the law of attraction...that whatever we focus on increases

...so, if we focus on gratitude for all of those things we appreciate and love in our lives...
those very things will be nurtured and healed and will flourish and increase

...if we walk with an intention of GRATITUDE for the healthy waters, the healthy seeds,
peace in our hearts, the oneness of all life everywhere... anything we can imagine that brings us joy

...this is what we will experience

...this walk is a walk of joy, in gratitude, and celebration
